English IMPORTANT - READ BEFORE INSTALLING

Important Notes

To install powermanager:

1. On the installation disk, double-click **setup.exe** to start installation.

    a. The standard program path for the powermanager installation is C:\Siemens\SENTRON.

    b. If you change the standard installation directory, ensure that there are no blank spaces in the new directory path name and project name.

2. Direct upgrade of projects to powermanager V3.5 is possible only from powermanager V3.0 and higher versions.
    You may also find an FAQ at: www.siemens.com/powermanager/support

3. Use the **powermanager_help_en.pdf** file on this DVD to get started with powermanager.

4. To create new projects, launch **powermanager Project Admin** from **Start menu >All Programs > SENTRON > powermanager V3.5 > powermanager Project Admin**. In the Project Administration panel, Click on **New Project** button. Ensure that there are no blank spaces between in the new directory path name and project name.

Example:

Allowed	Not allowed
C:\Siemens\SENTRON\powermanager	C:\Siemens\SENTRON\power manager
C:\Myproject	C:\My project

5. Read the notes in the **Readme.pdf** file carefully.

6. For up-to-date hot fixes / service packs for powermanager see:
